

Weak Hearts

Are due to indigestion. Ninety-nine of every one hundred people who have heart trouble can remember when it was heart trouble. It is a scientific fact that all cases of heart disease, no organic, are not only traceable to, but are the direct result of indigestion. All food taken into the stomach swells the stomach, putting it up against the heart. This interferes with the action of the heart, and in the course of time the delicate but vital organ becomes diseased. Mr. D. K. Smith of Portland, O. says: "I had heart trouble and was in a bad state as I had heart trouble. I took Kodol Dyspeptic Cure for about four months and it cured me."

Kodol Digests What You Eat and relieves the stomach of all nervous strain and the heart of all pressure. Bottles only \$1.00. Size holding 2 1/2 times the size. Prepared by E. O. DeWitt & Co., CHICAGO.

ANNUAL MEETING WAS HARMONIOUS

Merchants' Mining Co. Elects Officers.

Large Representation of Stockholders Present—Condition of Property Reported Favorable.

The stockholders of the Merchants Mining company held their annual meeting on Tuesday, at the office of the company, in Prescott. Great interest was manifested in the meeting, as was shown by the large number of stockholders present, in person, in addition to the stock which was represented by proxy. One Chicago man, who is a large stockholder, came here for the purpose of attending the meeting, and with the stock owned by himself and the proxies which had been given him by other stockholders, he voted 55,000 shares at the meeting. Everything passed off very harmoniously and the shareholders expressed themselves well pleased with the result of operations during the past year, and the present favorable condition of the mine. The actions of the officers for the past year were unanimously ratified, and endorsed, which was a high compliment to their efficiency and to the confidence reposed in them by the stockholders.

H. Gray, foreman of the mine as well as a director of the company, was present at the meeting and had a talk of one hour to the stockholders. This was taken from the drift in the fourth level of the mine, the deepest workings at present. The ore body is quite strong at this point, and the ore of a good milling quality and it was highly gratifying to all the stockholders present to witness this evidence of the continuation of the ore bodies at depth, and the possibilities of it for the future which is most promising and work will be continued on the property with renewed vigor.

Directors elected at the meeting were: Morris Goldwater, Ray Hill, P. L. Wright, Sam Salzman, Sil Simon, E. Block, and B. H. Gray. At the conclusion of business of the stockholders, the newly elected board of directors held a meeting and elected the following officers: President, E. Block; vice president, Morris Goldwater; treasurer, E. Block; secretary, E. B. Molen.

In discussing the condition of the property owned by the company, the president, Morris Goldwater, stated that the mine contains considerable quantities of ore of a high grade, there is a very large amount of that could be worked at the mine with a good profit, but which will not bear shipment and leave much profit to the company. Hence it would increase the profit on nearly all the ore produced, with the exception of the very highest grade ore.

Great activity continues in the district in which the Merchants Mining company's properties are located. The old properties being worked full handed, while a number of new properties are being started up, so that the prospects for this company as well as for the mining interests generally in that locality is most flattering and gratifying.

At the regular session of the board of supervisors held in this city Wednesday of this week, the board, by resolution ordered the balance of the issue of \$50,000 school bonds for District No. 1, the new order being for \$3000, the amount which still remains to be issued, to be put on account of the assessed valuation of taxable property not being great enough. It will be remembered that in 1900 an election carried to issue \$50,000 in bonds to build a new school building and otherwise improve the school grounds and buildings. At that time but \$33,000 could be issued on account of the valuation of assessable property not being great enough to meet the entire issue. Last June the valuations in property had increased until \$8000 additional bonds could be issued which was done, thus leaving \$3000 of the original issue left to be issued when the valuation of taxable property had sufficiently increased. This has now been reached and as a result the board has made the order as above. The bonds are for twenty years and bear five per cent per annum interest.

Chairman Scheurman reported the approval by him of the following for \$1000 bonds, to wit:
